**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-5 and 12-22, drawn to a method of location monitoring at a communication network, classified in class 455, subclass 456.5.
  - II. Claims 6-11 and 23-25, drawn to a method of determining the position of a radiotelephone which has made an emergency call, classified in class 455, subclass 404.2.
2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are distinct, each from the other because of the following reasons: invention I has utility about the method of location monitoring at a communication network, while invention II has separately utility about the method of determining the position of a radiotelephone which has made an emergency call.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different subclasses, restriction for examination purposes as indicated is proper.
